Cover Letter

Dear Hiring Manager / Recruiter,

RE: <u>APPLICATION FOR A SOFTWARE DEVELOPMENT JOB.</u>

My journey as a Software Developer started in 2015 after i had graduated with a Diploma in Civil and Building Engineering at Kyambogo University.

I decided to go the self-taught route to improve and build my skills in software development.

Over the years, i have played with a couple of technologies ranging from JavaScript, PHP and currently JAVA.

I have also gone through a couple of online curricula to mention but a few:-

- "Network+" and "Linux+" sections of [Cybrary](https://www.cybrary.it/)[1].

- "Front End Development" section of [Free Code Camp](https://www.freecodecamp.org/steven7mwesigwa)[2].

I am currently interested in working on JAVA projects.

My Skill Set:
Java, Javascript (prior experience), PHP (proficient)

Other Skills:
Wordpress, MySQL, Network+, Linux+, Jquery, HTML5, CSS3

For more information about some of my works, don't hesitate to check out my [portfolio website](https://www.steven7mwesigwa.github.io/)[3].
Attached are copies of my Curriculum Vitae and relevant Certifications.

I would welcome the opportunity to meet with you to discuss my qualifications and the next steps. Thank you for your time and consideration.

Yours sincerely,
Steven Mwesigwa
